

## LOCATION

405 – 407 BEULAH HILL, UPPER NORWOOD, LONDON SE19

## CLIENT

BEULAH PROPERTY LTD

## CONSTRUCTION VALUE OF SCHEME

£1.5 MILLION

## ARCHITECT

THE ROGER WENN PARTNERSHIP

## FACT FILE

Kaymac were appointed to construct a new four storey block, consisting of 14 luxury apartments with a central access core from ground level. Extensive external works and associated services also formed part of the scheme. There are four flats per floor and two at penthouse level. The apartments were finished to a high specification with materials for kitchen, bathrooms and finishings being

imported from various parts of the world. Kaymac were responsible for the design of the mechanical and electrical installation. The existence of a school adjacent to the site meant that Kaymac had to be particularly careful during construction, especially with regards to protecting an existing live gas main on the site which served the school. The works were completed to the approval of the NHBC.

## FEATURE

## COMMENT

Walls	Facing brickwork and blockwork cavity walls externally, with blockwork cavity walls between flats
Central Core	Consisting of lift and stair shafts with common area entrances
Floors	Precast concrete to Engineers Specification
