

LOCATION

GEORGINA COURT, BEULAH HILL, LONDON SE19

CLIENT

M.W. DOUGLAS PROPERTY INVESTMENT LTD

CONSTRUCTION VALUE OF SCHEME

£1.5 MILLION

ARCHITECT

BARRETT HASKINS DESIGNS

FACT FILE

Kaymac Construction undertook a Joint Venture with a property owner and secured planning to demolish a commercial office block and build 10 no. new residential apartments. The units were built to a contemporary design, comprising a timber frame with steelwork supporting cantilevered balconies, all supported on piled foundations. A high quality finish was achieved along with an excellent ECO Homes rating which was a planning condition.

FEATURE

COMMENT

External Walls	Facing brickwork, Self-Coloured Weber rendered panels complimented by timber boarding
Roof	Single ply high performance membrane fully bonded to insulation
Balconies	Powder coated pre-fabricated balconies with deck boarding to match vertical timber boarding
Upper Floors	Monarflor Acoustic batten system on TJI joists built to robust details
Lift	Machine-room-less-elevator 8 person fully Part M compliant passenger lift
Heating/Hot Water	Boilers working in conjunction with solar heating panels located on the roof
External Areas	Access controlled gates to car park and pedestrian areas. Powder coated railings bound planted areas and car park including refuse area and cycle rack
